

CASE STUDY

BPGS CONSTRUCTION, LLC

Challenges

BPGS provides a broad range of integrated preconstruction and construction management services. Comprised of owners, builders and developers, the multi-disciplined firm needed technology that would allow team members to work more collaboratively with each division's specific workflows and a robust cost management solution. The rigid technology platforms they were working with were creating inefficiencies as well as risk. Duplicate data entry, multiple logins, and lack of flexibility was creating roadblocks in the company's cost management and reporting capabilities.

Solutions

BPGS embrace of innovative solutions leveraged from the diverse market segments they serve, drew them to Kahua's modern platform. Kahua's out of the box functionality is easy to implement, but also flexible enough to be tailored to comply with BPGS's unique business processes utilizing kBuilder, Kahua's Enterprise Low-Code Application Platform which enables partners and customers to efficiently convert new ideas into apps in less than half the time of traditional development approaches. Kahua's Cost Management suite enables true collaboration with complete control over access to cost data and approvals, change management and real-time visibility into the complete financial status of projects.

- *Construction Management and General Contractor affiliate of The Buccini/Polin Group*
- *Manage projects from \$100,000 to excess of \$150 million*
- *Serve hospitality, entertainment, office, industrial, residential, parking, and retail sectors in Mid-Atlantic*

"Software being able to conform to your business is essential. It's not about how complex we can make it; it's about how easy can we make it for our users to adopt it."

Monica Rizzo Project Administration Administrator, BPGS

Results

Kahua's robust cost management solution, with adaptable workflows, integrations to ERP, real-time reporting, and the flexibility to rapidly configure and extend applications, allowed BPGS to deliver well-engineered, value-driven results in the most efficient manner to their clients. BPGS built a unique change order management process to manage budget and cost intuitively and effectively, with kBuilder's low-code environment.

Kahua was able to rapidly conform to not only the needs of BPGS as a company, but to each division's specific workflows and systems. Due to their great success, BPGS currently has plans to expand Kahua into five other divisions of the Buccini/Pollin Group.

"Past software solutions held us hostage. With Kahua, we no longer have to put in a request for a report and pay extra to have someone create those reports."

BPGS

BPGS Saves Time and Money with Kahua

Save 2 hours a week per project viewing and compiling cost reports. Utilizing Kahua's real-time reporting, with 10 projects going on at a time, that's 20 hours of manpower freed up.

Reduced total solution costs by 70% compared to their former software solution. No more inflexible, costly solutions.

Consolidate and reduce costs, Kahua replaces many point solutions like Drop Box, Blue Beam, DocuSign, and more.
